8. Caution

- i Cleaning:
 - * Use the neutral detergent or isopropyl alcohol on a clean soft cloth to clean the panel surface. Chemical solvent, acidic, or alkali liquid are not allowed.
- ii Installation:
 - * Bezel edge must be positioned in the area between the active area and view area. The bezel may press the touch screen and cause activation if the edge touches the active area. A gap of approximately 0.5 mm is needed between the bezel and top electrode. It may cause unexpected activation if the gap is too narrow. There is a tolerance of 0.2 to 0.3 mm for the outside dimensions of the touch panel and tail. A gap must be made to absorb the tolerance in the case and connector.
 - * Gasket or cushion pads around the edge of panel are recommended to segregate water and/or dust contamination.
- iii Operating:
 - * Touch the panel with your finger or stylus only to assure normal operation. Any sharp edged or hard objects are prohibited.
 - * Operate the panel in a steady environment. Abrupt variation on temperature and humidity may caused malfunction of the panel.
 - * Avoid high voltage and/or static charge.

9. Warranty

- * The product is guaranteed for one year after shipping, however, products shall not be guaranteed under the following conditions.
 1. Damages caused by improper handling from clients, including shipping, installation, and integration.
 2. Natural calamity or disaster after receiving the products.
 3. Repaired, modified, disassembled without permission.
